Reservoir reflections

A set of pictures at the beginning of the year from my third workshop trip to mid-Wales and the Elan Valley. Concentrating on reflections, macro work and refining and improving my technique a bit.

All in focus

Milky water

Winter reed

Raindrops on rush

Quite a few of the pictures were taken during U3A Photographic Group "fieldtrips". As much a social occasion as anything. The short length of time you have to take pictures does force you to search quickly for compositions - in itself not a bad practice to get into. This book features two trips to Cardiff Bay, this one where I tried my macro lens out and was very pleased with the results I got, and later on, a visit focussing on the theme "Red in the Bay".

You can never get enough magnification

A departure from my usual photobooks. This one contains a few pictures of people.

Above mum, two pairs of glasses and a magnifying glass at the ready for her iPad.

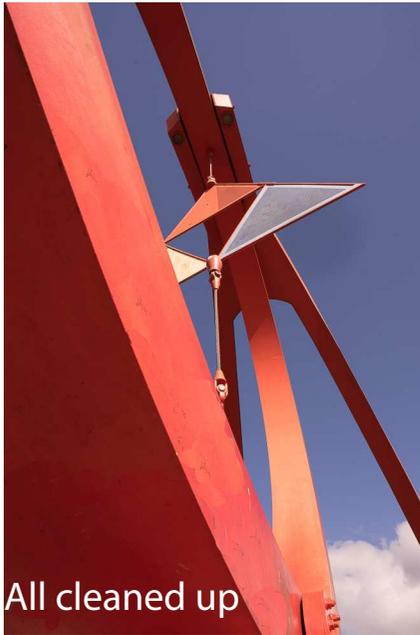

To the right Dougie.

All cleaned up

I know what you're thinking

Untouched by human hand

A set of images from a trip to Newport. I was amazed at how little I knew of Newport.

So much so that I've determined to go back again. There's a park, a cathedral, a civic centre and the canal to explore - not to mention the transporter bridge!

Old chums together

We had an informal re-union of friends from our days at Aberystwyth in early September. Great fun, and good to see each other again after so many years.

I use Adobe Lightroom CC 2015 to post-process the photographs taken with my Sony A7r or Sony NEX-6 cameras. I also take photographs with my iPhone 6s.

Several galleries of my images can be found on my website - Moments like these [<https://mlt.photography>] and I write about them on my blog - Moments like these ... [<https://moments-like-these.com>].

This book records the pictures I took during 2017 at a variety of locations in the UK and represent about 2% of the photographs that I took during the year. The selection for this book is of course a very personal one. They may not be technically the best that I've taken, they may not even be what others more gifted than I would describe as "good photographs", they are however ones I like. I hope you like them too.
